October Health Tips

Some tips in reducing salt and sodium intake by the National Kidney Foundation which can increase blood pressure and damage the kidneys over time:

1. Use fresh rather than packaged meats.
2. Choose fresh fruit and vegetables, which are low in sodium.
3. When buying frozen vegetables, choose those that are labeled "fresh frozen," and do not contain added seasoning or sauces.
4. Make it a habit to read food labels prior to purchasing foods.
